HEALTH AND SAFETY

Food Safety

The insurance of Quality and Food Safety, that Zeus Hotels manage, is a key priority for its Administration, its executives and all employees in hotels' food departments.

As a result, a Food Safety Management System has been established, in all Zeus Hotels, in accordance with the International Standard **ISO 22000:2005**, which was certified in 2015.

In this context, the management of **Zeus Hotels** for each one of its hotels:

- ✓ Is committed to comply with the legal and regulatory requirements as far as food safety is concerned
- ✓ Sets realistic as well as ambitious goals which help to improve and update the management system
- ✓ Has developed a close, honest and sincere cooperation with the supervisory authorities and the members of the food network in order to protect the consumer's health
- ✓ Continually invests in the development of new technologies and techniques which improve the hygiene level of its products

HEALTH AND SAFETY

- ✓ Disposes of further plans concerning the management of potential food safety crisis and proceeds to timely and full withdrawal in case a product does not abide by the rules
- ✓ Invests in continuous formation workshops, in informative and educative seminars, so that its members could promote ensure and guarantee food safety in each of their activities
- ✓ Maintains a specific sampling plan for the regular check of both food and drinking water, in collaboration with an accredited laboratory, with excellent results
- ✓ Conducts regular, unannounced internal hygiene inspections in all food departments, in collaboration with an external inspector - food safety advisor.

ISO 22000: 2005 certification for Zeus Hotels means:

- ✓ Prestige and international recognition
- ✓ Knowledge for controlling the food throughout its course: from the initial selection of raw materials and the confirmation of the strict quality criteria upon receipt from the hotel, until their presence at the buffet for the customers
- ✓ Customers' trust

HEALTH AND SAFETY

Prevention of Legionella

INFORMATION FOR THE BACTERIA AND THE DISEASE

Legionnaires' disease was named after a respiratory infection from which a large number of veterans of the Legion of America suffered, in a conference in Philadelphia, USA, in 1976.

The bacterium that causes the disease belongs to the Legionella Spp family, while there are approximately 42 legionella species, with Legionella Pneumophila being the most common species associated with the disease.

L. pneumophila has been found in natural water sources such as lakes and rivers, as well as in artificial water installations such as cooling towers for water-cooled air conditioning systems, cold and hot water systems (taps and showers), water storage tanks, spa baths, garden watering systems, water shows (fountains, indoor waterfalls, etc.).

The contagion is achieved when the person inhales droplets (size 1-5 mm) contaminated water with legionella. So, a running a tap, a shower, cleaning a toilet, even the bubbles emerging from a spa reservoir, can cause infection.

Legionella:

- ✓ In temperatures above 70 degrees of Celsius, is destroyed
- ✓ In temperatures from 0 to 19 degrees is inactive.
- ✓ In temperatures from 20 to 45 degrees, multiplies.

Legionella's proliferation is favored when a bio membrane has been developed on the internal surface of the piping, which is created when there are rust, salts, algae and micro-organisms.

HEALTH AND SAFETY

OUR ACTION:

All Zeus Hotels have a specific procedure to prevent Legionella from appearing on their premises, based on the 15-Point Plan of the European Guidelines for Legionella Control.

The Plan, among others, provides:

- ✓ Responsible person, suitable trained to prevent Legionella
- ✓ Training all housekeeping staff for proper cleaning and disinfection in rooms and public areas
- ✓ Regular maintenance of the entire air conditioning system by qualified professionals
- ✓ Cleaning the air conditioner filters at each customer departure
- ✓ Cleaning and disinfection of tanks and pipelines of cold and hot drinking water
- ✓ Regular inspections of tanks and pipelines
- ✓ Daily temperature, chlorine and pH measurement of potable water in tanks, kitchens and rooms

The confirmation of the Scheme is achieved by sampling drinking water, based on a specific schedule, in collaboration with an accredited analytical laboratory.

HEALTH AND SAFETY

Swimming Pools Management

Zeus Hotels apply all the hygiene and safety rules in the management of swimming pools, which is assigned to suitably trained and experienced staff, to whom is provided continuous training by professional chemists, engineers and lab analysts.

In our Swimming Pools:

✓ At least 2 times a day, water quality check (chlorine concentration, temperature, pH) is performed using advanced technology and corrective action is taken, when needed, based on specific instructions for the use of chemical formulations by professional chemists and suppliers.

- ✓ In Daily bases the inside, their filters and the outside surrounding areas are cleaned thoroughly.
- ✓ Continuous checks are made daily for any damage and safety issues
- ✓ A microbial water analysis is performed by an accredited analytical laboratory based on a specific sampling schedule.

ENVIRONMENTAL MANAGEMENT

In Zeus Hotels the TRAVELIFE Sustainability System has been established, certified so far in two of the company's hotels, while a certification inspection is scheduled for two more of our hotels during the next year.

In this context, each one of **Zeus Hotels**:

- ✓ systematically monitors and observes the environmental compliance obligations related to the environmental aspects
- ✓ systematically identifies, evaluates and controls the environmental impacts of all hotel activities, including external providers, customers and stakeholders
- ✓ protects the natural environment from harmful changes and degradation caused by its operations and services
- ✓ takes care of environmental protection including pollution prevention, sustainable use of resources, mitigation and adaptation to climate change and the protection of biodiversity and ecosystems
- ✓ rationally manages its produced waste and increases the amount of materials for recycling, compared to those available for disposal

ENVIRONMENTAL MANAGEMENT

Waste Recycling

- ✓ In 2017 bins were placed for the separate collection of paper, plastic and glass at public locations so that all customers and hotels' guests can recycle
- ✓ Since 2018 we have been expanding our partnerships with waste collection and recycling companies so that the list is complete and includes as many categories as possible:
 - Paper
 - Plastic
 - Glass
 - Oil
 - Containers of chemicals
 - Batteries
 - Electronic / Electrical equipment
 - Scrap metal
 - Printer inks and toners
 - Garden waste

The Management, supporting this important effort, is committed to:

- ✓ ensuring the necessary resources for the efficient operation of the Recycling System and its continuous improvement,
- ✓ the continuous training and education of staff and their encouragement to active participation, in the field of operation, in order to avoid environmental pollution,
- ✓ advising our partners and customers to participate in the waste recycling process

ENVIRONMENTAL MANAGEMENT

Consumption of Natural Resources

In all our hotels, important actions have been taken in order to **reduce energy and water consumption**. For instance:

- ✓ installation of switches on balcony doors that shut off the power of A/Cs in the rooms, when the doors are opened
- ✓ the use of electronic key cards that shut off the power supply when the guest is leaving the room
- ✓ changing linen and towels every second day
- ✓ replacement of all standard light bulbs with new ones of low energy consumption or led lights in all public areas, accommodations
- ✓ progressive replacement of window frames and glass where necessary
- ✓ purchase of equipment of high energy class
- ✓ replacement of old electrical equipment
- ✓ adding solar water heaters
- ✓ building insulation
- ✓ installation of water flow reduction systems on washbasins' taps
- ✓ systematic recording of water consumption meters for the early detection of any possible leaks.

Comparative figures for energy and water consumption during the years 2021 and 2022 are set out below.

However, it is worth noting, that in 2021 the hotels operated for a limited period and with a significantly reduced number of visitors, which is reflected in the consumption indicators per guest-night.
